

Yarmouk University is committed as an educational institution primarily concerned with promoting sustainable development and confronting the pressing local and global challenges facing the world. In line with its vision and mission, and in implementation of its strategy to achieve its basic missions of (education, scientific research and community service), the university offers a group of training courses that focus on aspects of environmental sustainable development. These courses are designed to provide university faculty and staff with the knowledge, skills, and awareness necessary to address environmental, social, economic, and climate change issues, ensuring a more sustainable future for future generations
