

# Sustainability Report 2025

Yarmouk University is deeply committed to promoting sustainable development and addressing global environmental and climate challenges. As part of its strategic mission, the University Sustainability Office offers a comprehensive suite of annual training programs specifically designed for faculty and administrative staff. These courses aim to equip the university's workforce with the necessary knowledge and skills to integrate environmental, social, and economic sustainability into education, scientific research, and community service. These programs are categorized to target academic leaders, administrative directors, new faculty members, and specialized technical staff to ensure a university-wide culture of sustainability.
